Abstract— Confronting information overload and good ability decision with our application We manage to collecting most ideas and structure in a unique process and by identifying Then, we can better way of getting the profit, cost and risk for good decisions, like market strategy and development plan etc. Application is a mapping program, designed to create a mapping that can favour you visually organize almost any sort of process. visualize Concepts, Research Topics ,Plan Projects Enhance Presentations ,Brainstorm Ideas. Application also has extras features like a system of tags and types, a calendar that can sync with Google Calendars, a full-screen Presentation Mode that will support for HTML export, and integration with Outlook as well as, Mac apps like Address Book. Whether you're building a complicated Web site or conducting academic research, this app can help you build searchable networks of details with tools for taking notes, produce shortcuts, zooming out to get a higher-level view and even creating reports.

Key words: HTML, Research Topics, Google Calendars.

I. INTRODUCTION

Mind mapping may be a extremely effective method of obtaining data in and out of your brain. Mind mapping may be a artistic and logical means that of note-taking and note-making that virtually "maps out" your concepts.

They want a natural structure structure that radiates from the middle and use lines, symbols, words, color and pictures in line with easy, brain-friendly ideas. Mind mapping converts an extended list of monotonous data into a colourful, unforgettable and extremely organized diagram that works in line along with your brain's natural method of doing things.

One easy thanks to perceive a Mind Map is by comparison it to a map of a town. the town center represents the most idea and thoughts ; the most roads ruling from the middle and it represent the key thoughts in your thinking action; the secondary branches or roads represent secondary concept ,idea. Unique pictures or shapes will represent landmarks of interest or notably relevant concepts.

II. SCOPE OF THE SYSTEM

- Information will be additional as quick as you'll sort - and it'sneat.
- Editing all aspects of the Mind Map is simple, while not having to redo the entire Mind Map.
- Clipart, digital pictures, audio and video clips will be inserted.
- Colors will be additional to words or branches to focus on associations.
- Connections square measure shown with simply generated links or arrows.
- A giant Mind Map will be divided and joined to a replacement Mind Map file.

- A Mind Map doesn't got to be restricted to the boundaries of a written page.

III. MODULE

A. Design

Mind mapping is used to map the ideas in a organized way, giving a logical meaning. Mind map will be a combination of colors, nodes, center, information etc. users can depict and design the plan step by step with all related information clubbed.

1) Instant Access

- Any no of maps can be added in the application interface
- Integration with All Files and Web Pages Any type of information can be integrated in the application, that is web pages, notes, docs, images etc

2) Preference

- Preferences and color coding can be used to highlight a particular process, even the background can be also customized

3) Types

- Maps can be made private for the personal management.

B. Search

As the mind maps will include multiple data or information application gives an option for the search or to pinpoint particular information.

1) Directed Link

Any type of linking is possible while designing; links can be embedded in the design.

2) Tags

Flagging can be done by the tags

3) Change Relationships

While different activities and process can have dependency or say parent child relation, application helps to manage the relations also.

C. Module Organizer

1) Report

- Thoughts reports can be generated
- Task management
- meeting management and task tracking
- check all task assignments
- information integration
- activate reminders
- activate reminders
- notes can include outlines, checkboxes, images, links, tables, and more.
- Themes
- Prebuilt themes can be selected to work fast.
- Multiple-

- Multiple actions can be taken eg select multiple thoughts and one shot can delete or link
- Calendar
- Built-in calendar option is provides plus even the application can be integrated with Google, ical, outlook etc.

D. Module Synchronization

Multiple teams can work in synchronized way to prepare the plans using our application. Work space integration helps in better planning and decision making. As the application is on the cloud it helps to manage the things in an easy way.

1) Duplicate

Any type of duplication eg events, attachments etc can be done to make the work fast

2) Backup

Application will keep the backup of all the designs so the users need not worry about the data loss or security.

3) Encryption

Application uses 128-bit AES Encryption to save the data so we can say all the important information is fully protected.

4) Resources

maps can be synchronize from any machines, either offline also.

IV. PROPOSED SYSTEM

The inventive potential of a mind map is helpful in group action sessions. you simply ought to begin with the essential drawback because the center, and generate associations and concepts from it so as to gain an oversized variety of various doable approaches. By presenting your thoughts and perceptions during a spatial manner and by victimisation color and photos, a stronger summary is gained and new connections is created visible. Mind maps area unit some way of representing associated thoughts with symbols instead of with extraneous words one thing like chemistry. The mind forms associations virtually outright, and "mapping" permits you to jot down your concepts faster than expressing them victimisation solely words or phrases. of words

V. EXISTING SYSTEM

Existing system faces some of the drawbacks, in the proposed system we will be eliminating all the drawbacks and added new easy to use features

- Can't incorporate large chunks of text.
- You have to stick to the rules of mind mapping to get the optimum benefit from the tool.
- Creating the map may take time. However, this will help you to review or recall information and will check your understanding.
- When you've personalized your map, it can be difficult for others to understand.

VI. RESULT

A. Login Page

B. Selecting Node and Add Attachment

C. Check Attachment Type

D. Custom Color-Red Selected

E. Check Template Folder Option

F. Click Different Nodes To Get Details

G. Expand Option

H. Create New

I. Tools option for content management

J. Insert options

K. Insert Link

L. Search Option
