Abstract— The proposed game will be a computer game version of the popular Survival games. Players will be able to play the game in the Single or multiplayer style known as Survival Maps and Pick the weapons and Shoot the Enemy or Real Players in closest Combat. The game will allow from one to ten players to play with Other Player In battle. The game will deal with in artificial intelligence for bots in training matches and can be used for multiplayer in future. The game also in VR (Virtual Reality), if player have VR then they can enjoy the gaming experience in VR mode. Due to the nature of the game, the graphics will be in 3D and offer open world layout and best experience to feel similar to real World. There is Many modes will be added for best gaming Experience and motivate player to play the game.

Key words: Open World Game, Survival Shooter, Virtual Reality Game, Online Multiplayer

I. INTRODUCTION

The proposed game will be a computer game version of the popular Survival games. Players will be able to play the game in the Single or multiplayer style known as Survival Maps and Pick the weapons and Shoot the Enemy or Real Players in closest Combat. The game will allow from one to ten players to play with Other Player In battle. The game will deal with in artificial intelligence for bots in training matches and can be used for multiplayer in future. We are aiming that the player should feel more realistic and connect to the game. The game also in VR (Virtual Reality), if player have VR then they can enjoy the gaming experience in VR mode. Due to the nature of the game, the graphics will be in 3D and offer open world layout and best experience to feel like real World. There is Many modes will be added for best gaming Experience and motivate player to play the game.

II. LITERATURE REVIEW

- 1) Most of the Player these days are on their Xbox or PS or PS3, busy battling it out with their Friends. It just not the players who are playing it anymore but also other people who are not games, but they are equally enjoying them. It's time to take these videos games seriously and look at it as a better option when it comes to choosing a career path.
- 2) Gaming is a part of the creative industry that provides numerus opportunities to those who are passionate about coding and animation their own imagination.
- 3) Game development is the process of creating a video game, where the Game Developer and his team undertakes the developmental tasks for creating a game through a software development process. Games are one of the best form of creative outlet that allows developers to develop ideas from scratch and take it to fruition.
- 4) Gaming industry is not a easy thing as it has raked in 23.5 billion USD in revenue, in 2015. This is 5% more than the 2014, according to the Entertainment Software Association. According to Joanne Hageman, president at

the NPD Group, the gaming industry performed very well in 2015 that it has become a benchmark to measurement the popularity of Game Industry.

- 5) Developers are putting their faith in Unity 3D, and Unity 3D is the best when it comes to game development. Here are some answers by experts and experienced professionals, on the topic of game development With Unity 3D.
- 6) Now that everyone is know, that Unity 3D is one of the top-ranking engines for Game Development, let's look at the reasons, Why Unity 3D is popular and what makes it a go-to choose for game developers. (1.1) Most popular option among developers. (1.2) Unsurpassed licensing standings in the game industry. (1.3) Easy to use and it is compatible with every Gaming platform. (1.4) Unrivaled community support. (1.5) Low learning curve.
- 7) Now that you have all the facts, number, and are confident about taking the next step toward game development, here's more positive news to your beliefs. (2.1) Virtual reality will be on the Top right now. (2.2) Virtual Reality and Augmented Reality will be a major portion of new investments in gaming. (2.3) when it comes to consoles, Sony Play Stations will be leading again. (2.4) Game companies will explore the possibilities of augmented reality or mix reality. (2.5) the gap between social media and games will continue to shorten in few Years. (2.6) Dedicated gaming and game will spread its dominance over mobile devices. (2.7) the gaming market in India and Brazil will be game changing in the coming years in both platform PC/Console and Mobile. (2.8) the traditional gaming media will leave way to new and innovative ways of reaching users with better gaming experience.

III. STUDY FINDINGS

- 1) Recent high-profile into the world of VR technology by industry giants such as Facebook, with their recent purchase of VR hardware producer Oculus VR and Google's project Glass, point to a shift towards augmented and virtual reality or Extended reality and have once again began to capture the public's imagination.
- 2) Presently, Virtual reality as a new media is imposed more and more requirements. It is gaming that is designed to move and feel the realm of virtual reality forward. The number of gamers is expected to increase in future, including through the spread of virtual reality. Also, market revenue is predicted to rocket. In addition, mobile VR gaming segment will significantly high.
- 3) The game must be controlled with VR Handset, Xbox Bluetooth Controller, PC Keyboard and Smart Phone Screen. The game must be played on Mobile and display resolution will be HD Quality or 1920x1080. The game must feature music and sound effects, perfect Sync with gameplay.

- 4) Game helps user to build strategy. Game should be having 9 or Higher levels. Game should be having voice chat and with global chat tab include. Game should be having Virtual Reality with First Person Shooter. Game should be in Third Person Shooter. Device should be able to play Virtual Reality Games and Device must have Gyroscope.

IV. FUTURE ENHANCEMENT

We are aiming to make VR for everyone and anywhere. For that we make VR Hardware low price and optimize with our game and graphic of the Open World in Game Environment. Add the best feature and function that player come and play our game with VR technology. We add best communication in global chat, better UI for Games, Best Control for VR handset.

V. CONCLUSION

Revenge of Worriers is the game that take gaming experience to next level. With the Virtual Reality Technology, we give better user experience with Optimize graphics. The Concept of the game is to protect our self or team and fight with enemy and survive for the last man alive in the one match. Realistic Graphics that make user feel that He or She are there in environment and interact with the 3d object and real time situation. Players can choose to enter the match solo, or with a small team of up to ten people. In either case, the last person or team left alive wins the match with some bonus point. Due to the nature of the game, the graphics will be in 3D and offer open world layout and best experience to feel similar to real World. There is Many modes will be added for best gaming Experience and motivate player to play the game. In This Game player versus player (PvP) action game in which up to one hundred players fight in a battle For Survive, a type of large-scale last man standing death match where players fight to remain the last alive. Players can choose to enter the match solo, or with a small team of up to ten people. In either case, the last person or team left alive wins the match. Each match starts with randomly or Choose by the player where they were go onto a map area approximately 10×10 kilometre in size. The map varies with each round. Starting of the Game the player has only one weapon in hand when it appears in Battle Ground. Player can choose what melee Weapon he/she are use when they are appearing first time in battle filed. After the Starting match player has to save himself and kill the enemy to survive for game goes. After some time, the special location or special item are appearing for players. The items are very important for player because all item he collect, item can suggest the way for the last location or some time epic weapons free for the player. Player can buy weapons anywhere and anytime in game. The weapon is depending on game money. More money More High-End weapon are appearing in buy section of the player.

VI. ACKNOWLEDGMENT

We express our sincere thanks to Prof. Ajaykumar T. Shah Head of Department of Computer Engineering, Alpha College of Engineering and Technology for their Support and

guidance for this project and care taken by them in helping us to complete the project work successfully.
