Investors can easily upload the different-different requirement fund which can be seen by the different entrepreneur.

Key words: Investment Portal Money, Invest Idea Sharer, Client, Website, Portal, Investing, Contract Sign, Profit

I. INTRODUCTION

Investment Portal is a marketplace, where Investors and entrepreneur are able to find each other. This Project allows entrepreneur to post work and get done. Here, you can hire entrepreneur for your Investment. From this site Investors can easily directly access the entrepreneur profile and according the requirement Investors can filter the entrepreneur. Also it gives the different companies platform where it can find the entrepreneur. It provides the Investors the platform where they can search the different finance according to their plan & Execution. Investors can easily upload the different-different requirement fund which can be seen by the different entrepreneur.

II. PROPOSED SYSTEM

This system will be useful for client for online activities. This system will be on web so users can use it at any time. The chat bot is a computer program which is made to make conversation of a human with an intelligent machine for any online related queries.

III. ADVANTAGES

- Time is on your side – This is the
- Most straight forward of all the benefits, but yet it may be the most important of them all. Quite frankly if you begin investing at a young age history tells us that you
- Will end up with far more than those who invest later in life. Having time on your side means having a longer time period of being able to save money to invest and a longer time period of being able to find investments that can increase in value quite nicely.
- Compounding Returns
Compounding returns are extremely powerful over the long run, and the earlier you get started the greater your chance is to take advantage of this. Put more simply this

is the power of the time value of money. Regular investments in an investment portfolio or a retirement account can lead to huge compounding benefits.

- Improves Spending Habits
This benefit is generally overlooked by many, but investing early on definitely helps develop positive spending habits. Those who invest early on are much less likely to have issues with overstepping their boundaries in spending over the long run. Investing teaches important lessons and the earlier you are able to learn those lessons the more you can benefit.
- Ahead of the Personal Finances Game
If you are a young investor you are putting yourself ahead in the world of personal finance as a whole. By growing your investments over time you will be able to afford things that others can't. Your personal finances are bound to get tight at times throughout your life, and investing at a young age can help in those tight times.

IV. METHODOLOGY

The Banking Inquiry Chat bot is a website which will work on all operating system and all devices like pc or mobile phones. The main aim of this system is to reduce workload of bank employees and save time of customers who have query about bank loan or accounts or policies etc.

The system will work as:

- First of all, plain text or voice will be given to the system as an input.
- Than input in the form of the voice will be converted to text.
- From users query special keywords are found.
- Based on keywords appropriate answer is generated.
- Display result as voice as well as in text.

A. Modules

- 1) *User Registration (Paid Registration)*
 - Registration Form (Sign Up)
 - Reset Password
 - Change Password
 - Forgot Password

- 2) *Investor Management*
 - Add Investor
 - Manage Investor
 - Delete Investor
- 3) *Idea Management (Idea for Business)*
 - Add idea (user only)
 - Manage Idea
- 4) *Proposal*
 - Make Proposal to investor
 - Check status of Proposal

- 5) *Dashboard & advertise Reports*
- 6) *Feedback Panel*
- 7) *Post Queries*
- 8) *Inquiry*
- 9) *Social Media Integration*
- 10) *Payment Gateway with PayUmoney (For user registration)*
- 11) *Quick Links*

V. CONCLUSION

After envisaging the future aspects, we can conclude that this project is going to give efficient & more effective results in comparison of current applications, because with the help of this system our house is safe and secure. House is secure from the unwanted or unknown people. The system is very simple and easy to use and convenient for the users.

Through this app user of different city will be able to complaint their problems of their city without wasting time and money. This works more easily. Time consumption for going to corporation office is much less than online registration of complaint.

After envisaging the future aspects, we can conclude that this project is going to give efficient & more effective results in comparison of current applications, because with the help of this system discount list of the different site can be shown. This system is very simple and easy to use and convenient for the users
