Abstract— This paper is specially designed to describe the working prototype of the online college stationery website. This website’s front end and back end is developed with help of the wix. Our website consist of the following pages i.e. Home, Shop, Sell, Contact and about us. So the home page consists of the featured products which are highly recommended. In shop page user can easily buy products. In sell page first the user have to login if they are already registered otherwise they have to signup first and then log in and then they have to fill the form for selling their product. Contact page consist of our contact details and opening and closing time of the shop and in about page it consist all information of our background. We accept all online payments i.e. Credit /Debit and also offline payments i.e. Cash on delivery.

Key words: Online Website, Wix

I. INTRODUCTION

Every college needs stationery products to carry out the day to day activities. Which involves the use of various stationery product such as registers, files, pens every college needs stationery products to carry out the day to day activities. Which involves the use of various stationery product such as registers, files, pens, printing papers, eraser, pencils, markers and many other things.

So our concept is to develop such a website which will manage all the stationary related activity using wix.

This website is specifically designed for diploma colleges where all the stationary products related to diploma course can be sold and bought. The stationary products will be displayed according to the branch, year of course the student belongs to. If the user wants to buy the stationary, the user has to select the branch and semester the user belongs to according to that the stationary will be sorted and displayed to the user. There will be another option for the user while choosing the semester whether the user wants to buy First-hand stationary or Second-hand stationary. If any of the stationary product is not available, it will display that the product is out of stock on that particular stationary product. If the user buys new stationary the user can return the stationary at the end of the of the course. If the condition of the stationary is good the user can get a money back of 60% - 70% money back guarantee. The user can also donate their stationary. While buying the stationary products all the information related to that particular product such as the price, manufacturer etc. If the user wants to buy the a particular stationary product the user will have to enter his personal details such as Name, Address, Mobile number, Email id and the way of payment. If the user wants to sell any of the stationary products the user has to enter his own details as well as the product details. The admin will get notification on the admin panel that the user wants to sell a particular stationary product with all the information, if the admin confirms the request the product will be displayed on the

website by the admin. Printing papers, eraser, pencils, markers and many other things.

So our concept is to develop such a website which will manage all the stationary related activity using wix.

II. WORKING

When a student visits the website the student will be able to see all the required stationary on the website. If the students wants to buy a particular stationary he has to select on that stationary , Once selected all the information about that stationary, it also displays whether it is in stock or not . Once the students selects the add to cart option the particular stationary will be added to the cart. The students then has to enter his details and checkout and the order is placed .The student can buy second hand used products available on the website. In the administrator panel the administrator will get the notification of the order being placed. According to the availability the administrator will confirm the order. The administrator can modify the Website. The administrator can add as well as remove the stationary items from the website. If the students wants to sell his used stationary items on to the website the student has to fill the form containing his details and send request to the administrator about the items . If the administrator confirms the request the students’ stationary items will be displayed upon the website.

III. REQUIREMENTS

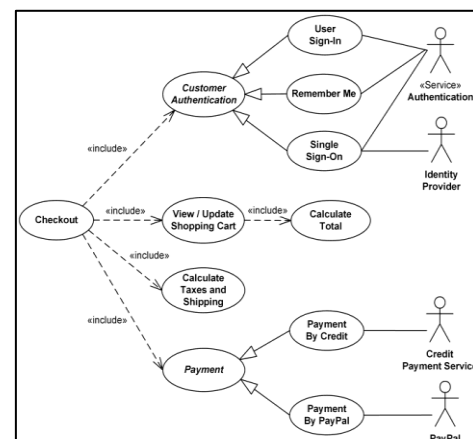

A. Hardware Requirements:

- 1) Processor: Intel Dual Core
- 2) Processor Speed: Minimum 1GHz
- 3) RAM: Minimum 512 MB
- 4) Hard Disk: Minimum 4GB

B. Software Requirements:

- 1) Operating System: Windows, Android, IOS.
- 2) Internet.
- 3) Web browser.

IV. USE CASE

V. CONCLUSION

So finally here we are with a website which is capable of managing the shops stationary in a very classified manner gives a flair edge of cleanliness and smoothness of access to products and tracking the products for profit and also used to check which product needs to be refilled and it also saves time and money which are the most important factors to any organization because it leads to profitable deal as this website will helps to carry out tasks with ease and thereby it reduces time and money on manpower and materials.
