Abstract— The purpose of the Web application is to provide a admitted web application between students and the placement officer. The aim of the project is to develop a website which provides Communication between students, staff, placement officer, and other connected to network, this web application works quite similar to Social Media Site. This website provide features like writing and posting a post or any events. The main objective of this project is to share the job related details posted by placement officer like adding a post which can be read by all the student as well as faculty/staff members. This web application is handled by the admin. Admin can manage student as well as faculty members. Students can register and login into the system once their registration is approved by the admin. Once the student logged in into the system, he/she can write and post articles on various topic of his/her choice. Also he/she can chat with the other students. Students can also upload images with their post. All students can view News Feed posted by individual student. The students registration will be approved/rejected by the admin as well, all the post will be kept pending until admin approves or rejects each and every post. Admin Login has full authority on system, he/she can add/delete Faculty. Placement officer can create a list of students by specifying the department and criteria. List will include Basic Details, Marks and Backlogs. Placement officer can add post and the post will be sent for approval to admin. Staff can view student profiles and also can post event whose details will be sent through SMS to students.

Keywords: Social Networking Site for College Students

I. INTRODUCTION

Networking sites allow users to communicate with people, share ideas, activities, events, and interests with others. Social Media sites such as Whatsup, Twitter, Facebook etc. have attracted millions of users. Many of users in world have started using these Social Networking sites into their daily practices. There are hundreds of Social Networking Sites, which contain various technological use, supporting a wide range of interests and practices. This Networking sites described the new way of communication through which contact to another person miles away from us has become easier. Sharing information, Video conference/call etc. made life easier. In short Social Networking sites connect the people.

The purpose behind implementing social media with this project is to build such a system through which job seekers i.e. students can stay updated about their jobs post who are in a search of job.

II. LITERATURE REVIEW

We have gone through the features of various social networking sites and made a list of some basic functions which are or are not available in these sites. This analysis

helped us to understand which social media specially only for students we can refer to in order to add our desired features. The following information provides an overall summary for some of the project similar to the project we are building

A. Designing a Social Networking Website:

The project aim is designing a social networking website for college. Student will be able to interact more effectively through e-learning platform, discussion and collaborating with one another with other etc. This will be best accomplished through college social network, and study will not be limited to only classroom. However, this project has presented all the basic functionalities that can keep up campus student on a study platform.

B. Social Networking Sites among College Students:

This paper state that by creating this website for college, it is aimed to strengthen the communication among users and make campus life more lively and exciting by combining academics and cultural activities. This social media platform will become an asset for the campus and can be used for various productive purposes. But the important thing to know about this project is that it is not password protected.

C. Social Networking Website for College:

This study makes a significant contribution in understanding college student use of social media. In addition, individuals are using social networking websites at increasing rates and visiting them quite frequently by every week. The Social networking websites offer new and innovative ways to communicate with each other individuals in a quick manner. Also this platform makes a unity among the students and students started to know each other

D. Mobile Social Network for College:

Even though there are similar applications in market, the idea of news feed is one of its kind. This application will be definitely useful to keep everyone informed about important notices & activities. But in this project the student cannot open the message until and unless he/she is connected to college network. he/she will have to be present in college so that he can connect to college network and than only he/she can see the important notices and activities.

E. Social Networking Site for College Students:

Networking in the form of online social networks is second nature for college students and aspiring young professionals today. The main purpose of creating Social Networking Site for College Students is for meeting college students and sharing knowledge, education related information's, etc. It contains standard social network content, like profiles, pictures, email and groups, and articles, etc. Student can create a profile, share and collect knowledge, education related articles, etc.
