Abstract— The purpose of the Android application is to provide a admitted Android application between students and teacher the placement .The aim of the project is to develop a app which provides connectivity between students, staff and other connected to network, These works very differently Our Moto is to provide self-coaching to student at his/her home. Student who as registered and purchase membership plan of selected stream and subject our admin will show the available teacher to student and he /she can select staff and staff will go so and teach to student this app provide features like reading notes of subject which selected in plan by student. when teacher goes student for delivering the lecture verification of teacher in done by application by sending OTP to student Dashboard in the app with these full details of teacher so that there would not any confusion between student if any person go to student home instead of register teacher, he/she can report and strict action or fine will charge to teacher which actually want be here. Our app also provide ladies staff for girls so that they can fill safe and enjoy learning of staff, In most of the cases parent want allow girls to join coaching classes which are too way from home due fees . We very affordable palm which register candidate can buy and enjoy the subscription. Admin is a owner of a whole system, Teacher and student both are registered user of our app. They have username and password for login in to app. Register Student can read material online from app everywhere using internet. Student and teachers can send and receive message to each other to keep the friendliness and bond between student and teacher in this project we. Teacher between 10 km from this local area.

Keywords: Tutor System

I. INTRODUCTION

The aim of the project is to develop a app which provides connectivity between students, staff and other connected to network, These works very differently Our Moto is to provide self-coaching to student at his/her home. Student who as registered and purchase membership plan of selected stream and subject our admin will show the available teacher to student and he /she can select staff and staff will go so and teach to student this app also provide features like reading notes of subject which selected in plan by student

In most of the cases parent want allow girls to join coaching classes which are too way from home due fees. We are giving these service at very affordable plan which register candidate can buy and enjoy the subscription.

II. LITERATURE REVIEW

As everyone knows that, the project is of online Tutor like byjus's but it is different from byjus. These project consist offline teaching to student individually as like traditional practice which is done before, which is still continued in

villages and town where teacher comes to home and teaches student.

- But now a days fees charged is very high in cites for tuition but there is lack in quality.
- In these project we cover the reduce the cost for the student so, that anyone can afford it.
- Students can track the teacher when the teacher is on the way for the home tuitions.
- These will create bond between students and teachers.
- IT will reduce unemployment and will give good result of student as expected by their parents.
- Everyone is connected to internet and uses mobile in cites and
- This project can be made in web/ android too .It will create user friendliness and anyone can interact through these project.

III. SYSTEM ARCHITECTURE

The project starts from flash screen of logo of app. Once you have entered the homepage you have to log-in into your system. There are admin account, student account, teacher account, admin and login into it. If the student is not having the account he/she can register and the registration will be approved by the admin. Admin have the authority to add faculty, approved post and view/delete the student/faculty .In short the admin has the control over app. A student can chat with the teacher for quires as well as person who have selected this teacher in his palm in the application having a active account these all activity will possible through internet access.

IV. PROPOSED METHODOLOGY

The project intends to provide a well-established application between a student and Tutor. The aims to make this project is to develop an app which increases the communication between Student, Staff, and friendliness while teaching not 'a bur done or headace' which is actually seen in institute or colleges. If one student and one teacher will be there then selected mentor will guide personally to student. Now days

education is provide just a seek off job or gauration certification but there is no quality seen in student.

Our purpose is very simple teacher who unempoyment will get job and student will get good mentor for year.

The following points are implemented in proposed system:

- Students can login if they already have a account otherwise they can register, after registration it will be approved by the admin.
- All the student registration can be rejected by the admin as well
- Admin Login has full authority on system, he/she can add/delete Faculty.
- delivering the lecture verification of teacher in done by application by sending OTP to student Dashboard in the app
- Our app also provide ladies staff for girls so that they can fill safe and enjoy learning of staff
- In most of the cases parent want allow girls to join coaching classes which are too way from home due fees. We very affordable paln which register candidate can buy and enjoy the subscription.

V. CONCLUSION & FUTURE SCOPE

Online tutor app is a revolutionary idea with a very bright future with further scope for advancements.

The opportunities provided from this medium are immense and many organizations are making use of this medium to better their practices

We provide live tracking of teacher in app for student that where is teacher at now

- Tutorials will be provided
- Government authorized certification can provide in future
- Scholarship will be provide by cracking complete exam like jee main,
- Online payment system will available.
